EDUCATION

B.Tech in Electronics and Communication Engineering

MAULANA AZAD NATIONAL INSTITUTE OF TECHNOLOGY

GPA: 8.84

Bhopal | Jun 2023

WORK EXPERIENCE

SOFTWARE ENGINEER

Azure Compute | Jun 2023 - Present

MICROSOFT

- Built a scalable, reliable failure-injection platform for biweekly Azure resilience drills, automating 10-15 failure injections (power-cycle, host restart, etc.) across 500-1,000 nodes and saving 16 hours of manual effort per drill.
- Expanded the fault catalog beyond power cycles and drove adoption across Azure services for automated resilience testing.
- Built an Azure Function pipeline that converts customer alerts into Azure incidents, enabling automated triage across internal teams.
- Shipped an MCP server that lets teams report Azure incidents via LLMs of their choice, streamlining incident creation for 100 incidents/month.

SOFTWARE ENGINEER INTERN

Azure Backup | Jun 2022 - Aug 2022

MICROSOFT

- Designed features to auto-disable Azure Backup for ransomware-affected VMs and secure recovery points, strengthening protection workflows.
- Built data processing and visualization to assess customer security posture and surface actionable recommendations.

PROJECTS

NURL

NUSHELL, CLI, API CLIENT

- Built Nurl, a cross-platform terminal API client that fuses Nushell's structured data with Postman-style workflows in a curl-native UX.
- Designed collections, environments, and history as git-friendly plain text to enable collaboration and traceability.
- Implemented variable interpolation, auth helpers, and request chaining, plus a TUI with readable table output.

LLM FINETUNING FOR SPAM DETECTION

TRANSFORMER, SELF ATTENTION, PYTORCH

- Implemented GPT-2 from scratch in PyTorch and loaded OpenAI pretrained weights for initialization.
- Replaced the LM head with a custom binary classification head to repurpose the model for spam detection.
- Fine-tuned the classifier while freezing base weights to retain language understanding and reduce training cost.

SKILLS

Programming Languages: C++, C#, Python

Backend & APIs: C#/.NET, ASP.NET Core, REST APIs, gRPC, WebSockets, OpenAPI/Swagger, curl

Cloud & Infrastructure (Azure): Durable Azure Functions, Azure Web Apps, Azure Storage, Azure Kubernetes Service (AKS) Cosmos DB, Azure Service Bus, CI/CD, ARM, Docker, Azure DevOps, Git

Observability & Security: Azure Monitor, OpenTelemetry, Azure AD, JWT

AI & Machine Learning: PyTorch, Agentic AI, LLM fine-tuning, LangGraph, MCP

Core CS Fundamentals: Data Structures, Algorithms, Object Oriented Programming (OOP)

Computer Networking, Database Management Systems (DBMS)

COMPETITIVE CODING PROFILE

- [LeetCode](https://leetcode.com/) • [GeeksforGeeks](https://www.geeksforgeeks.com/) • [HackerRank](https://www.hackerrank.com/) • [Codeforces](https://www.codeforces.com/)
